BIO - *Repel*

ORGANIC BIO REPELLANT AND GROWTH STIMULANT!

How does Bio-Repel work?

Bio-Repel contains the micro organisms like Bacillus thuringiensis and actinomyces that is proven to kill many types of worms, fungus and insects that carries disease and infest healthy plants.

Bio-Repel also contains herbs like neem, garlic, wood vinegar, zeolite, sulphur that further defends plants from worm, fungus and insect infestation. The combination of micro organisms and herbs makes Bio-Repel a long term solution which is far effective than poison and chemical based insecticides and pesticides. Bio-Repel contains source nutrients npk+ chelated t. E which is has beneficial micro organisms that can kill insects and prevent disease bearing fungus. Harmful insects that ingest BIO-REPEL will stop eating and will die of starvation in a matter of hours.

"All Natural Bio-Insect Repellant"

Are you looking for an Organic solution to Insects and Plant Disease and at the same time provide essential nutrients to the plant ?

What will you say, if there is a simple yet effective solution which is POISON and Chemical FREE ?

What is Bio-Repel?

Bio-Repel is a concentrated natural organic fertilizer and insect repellent powder. Bio-Repel contains major plant nutrients, organic chelated essential, trace elements, amino acids, humic acids, and seaweed extract. Bio-Repel is used to increase chlorophyll synthesis, it also stimulates natural plant growth, flowering, and fruiting.

Why use Bio-Repel?

Bio-Repel offers a practical and long term solution to organic growers faced with pest infestation and or plant disease. Bio-Repel is a poison free solution and it is also free from harmful chemicals in line with the requirements of "organic" farming. Bio-Repel means that you can ensure higher yields by improving the quality of the harvest. It does it by reducing the incidences of pest (insect manifestation) and the control of plant disease.

Bio-Repel is effective in killing and keeping away bad or non beneficial insects without unnecessarily harming good or beneficial insects. Bio-Repel contains micro organisms that releases important nutrients to the soil and earth.

How to use Bio-Repel?

Bio-Repel is SUPER CONCENTRATED powder. 1 gram of Bio-Repel can be diluted in 1000ml of untreated water. Use a fine spray nozzle sprayer to spray diluted Bio-Repel on plants.

Mix the powder and water and allow for it to mix and settle for 2 to 3 hours. Shake before use. Use Bio-Repel in the following frequency: If there is an attack or infestation of worms, fungus and insects - spray every 3-4 days. If possible spray directly on infestation to reduce attack. If for prevention - spray every 7-14 days.
